## RES + GOOGLE APPS FOR WORK

Drive adoption and efficiency through automation

As more companies look to move to cloud-based applications for day-to-day user productivity and move away from locally installed solutions, they turn to industry leaders like Google to provide these services. Google Apps for Work is a set of cloud-based tools that help organizations collaborate and get things done from anywhere, on virtually any device. You get access to tools for communication, collaboration, cloud storage, schedule management and security. RES accelerates customer adoption of Google Apps for Work by provisioning user accounts seamlessly for qualified employees and automating mail migrations from legacy systems.

### IMPROVED ONBOARDING AND OFFBOARDING

The employee lifecycle includes onboarding new hires, managing employee role changes and then fast, secure offboarding. Streamlining the onboarding process allows users to be productive on day one, delivering accounts and resources the employee needs based on their role in a matter of minutes, not days or weeks. RES provides a powerful and customizable workflow, allowing organizations to automatically provision Google App accounts and resources for a completely automated onboarding and offboarding process. When employees leave the organization, accounts, rights and resources are removed, saving the company money and ensuring compliance.

### BUSINESS VALUE CHECKLIST

Use RES solutions with Google Apps for Work to automate and simplify:

- ✓ Service and application delivery
- ✓ Google Site management and security
- ✓ Migration from non-Google mail platforms

## Google Apps for Work

Communication | Collaboration | Cloud Storage | Schedule Management | Security

### ENABLE SELF-SERVICE MIGRATIONS

Cloud-based mail providers help organizations deliver applications and service to their workers, but they need a way to migrate away from their existing mail system. Google provides a utility to assist customers with their migration: Google Apps Migration for Microsoft Exchange (GAMME) and for IBM Notes (GAMIN). This migration tool gives customers the ability to migrate mail, calendars, contacts or any combination of these. RES provides a framework to integrate with GAMME and GAMIN, allowing IT to automate the migration of thousands of users. RES also offers a platform for self-service so migrations can be triggered by individuals, managers or based on user qualifications.

## ENHANCED SITES MANAGEMENT

Google Apps for Work delivers Sites for team collaboration, allowing users to create and publish their own web pages without knowing code or needing technical support. This makes it easy to centralize documents, calendars, media and more. Sites support dynamic updates, ensuring data is current and keeps everyone on the same page. RES enhances the value of Sites with automatic and self-service provisioning. When a new worker is onboarded, they can be automatically granted access to their department's Google Site. Through the RES self-service portal, users can create new Google Sites for a project and modify access rights as needed.

## THE RES + GOOGLE FOR WORK PARTNERSHIP

RES joined the Google for Work partner program in 2016 to provide added value to customers using Google Apps for Work.

## RES AND GOOGLE APPS FOR WORK BRING BUSINESS VALUE

- **Enhanced User Experience** — take advantage of the exceptional flexibility that the cloud has to offer, allowing users to seamlessly access applications from any location and any device.
- **Faster Deployment** — automate user account creation and data migrations to allow organizations to quickly migrate users to Google Apps for Work.
- **Speed Adoption** — improve adoption rates by streamlining the provisioning processes and then enabling the users through self-service.
- **Lower Cost** — eliminate support costs because IT no longer needs to troubleshoot local app conflicts or test and roll out the latest releases of the software.

## MAXIMIZE YOUR INVESTMENT

RES offers many solutions that support and maximize the value of Google Apps for Work. Get maximized value from the RES ONE Enterprise, or solutions you can leverage independently:

<b>RES ONE</b> Workspace	Provide a secure, context-aware digital workspace to the end users, where they can access Google Apps for Work from their corporate desktops and mobile devices.
<b>RES ONE</b> Automation	Automate tasks beyond a typical app store. RES enables IT professionals to deliver any set of changes to the environment, including physical, virtual or web-based changes. RES automates the provisioning of IT resources, all from a single console. Run books can be used to accelerate user adoption by provisioning user accounts and migrating user data from existing systems. RES ONE Automation takes advantage of existing Google migration tools to build repeatable run books.
<b>RES ONE</b> Identity Director	Deliver services through the RES ONE Identity Director portal to provide a self-service migration to Google from Exchange or IBM Notes as an option for users.

## ABOUT RES

RES creates, automates and secures digital workspaces to improve the experience and productivity of the workforce while lowering IT costs. RES takes a people-centric approach to making technology access secure, even in complex multi-device/multi-location scenarios, across physical, virtual and cloud environments. RES boasts numerous patented technologies, fast time to value, and superior customer support for more than 2,500 companies around the world.
