

TECH ALLIANCE PROGRAM PARTNER FOCUS

RES + UNIDESK

Ensure a secure and consistent user experience

The Unidesk and RES partnership enables customers to deliver the right Windows user experience and the right Windows applications to the right users, independent of virtualization or cloud platform. Whether you're deploying remote desktop session hosts using Citrix XenApp or Microsoft RDSH or virtual desktops (VDI) using Citrix XenDesktop, Microsoft VDI, or VMware Horizon View, your deployment will offer a more secure and user friendly experience with these two leading solutions.

MANAGE YOUR APPLICATIONS WITH UNIDESK

Unidesk is the global leader in application layering, the easiest and most powerful way to manage Windows application life cycles and provide application mobility. Unidesk separates applications from machines, enabling them to be packaged once and delivered to any virtual desktop, session host, or cloud infrastructure.

MANAGE YOUR WORKSPACES WITH RES

RES is a leading digital workspace technology provider offering capabilities including endpoint and user environment management (UEM), policy-driven access, security, compliance, and automated IT services. RES offers proactive and self-service access to the apps and services that the workforce needs when they need them, in a context that empowers them to be more productive.

EVEN BETTER APPLICATION AND WORKSPACE MANAGEMENT

Customers using a RES ONE solution alongside their Unidesk solution can see a major reduction in the cost and resources required to manage and secure the user environment. IT organizations can ensure that Windows applications and desktops meet the often competing needs of end users, IT operations, information security and compliance.

RES AND UNIDESK BRING BUSINESS VALUE

Streamline endpoint management — utilize dynamic, automated workspace configurations, personalized for each worker across physical and virtual environments

Implement comprehensive IT controls — protect the business with context-aware security controls and proactively deliver and revoke access and services through policy-driven workflows.

Empower the workforce — automate IT services to empower the workforce through self-service and automated delivery of apps and services to each person's secure digital workspace.

BUSINESS VALUE CHECKLIST

Use RES solutions with Unidesk to automate and simplify:

- ✓ End user service delivery
- ✓ Identity and access management
- ✓ Application patching and security

Simplify application management — ensure application interoperability, centrally manage across virtual and cloud platforms, and rollback updates and user personalization to remediate common break/fix issues.

Modernize application patching — eliminate image sprawl so you're only ever patching Windows once, ensuring that security is maintained.

Redirect IT resources — transition application and image management to helpdesk and tier 1 IT staff to free up senior IT resources to work on more strategic projects.

Faster Time to Value — optimize your existing infrastructure for better IT efficiency and agility and see immediate value because implementation can be measured in weeks, not years.

THE RES + UNIDESK PARTNERSHIP

RES and Unidesk partnered in 2016 to provide mutual customers around the world with a better way to manage their user workspaces and applications.

MAXIMIZE YOUR INVESTMENT

RES offers many solutions that support and maximize the value of Unidesk. Get maximized value from the RES ONE Enterprise, or solutions you can leverage independently:

RES ONE Workspace	Centrally manage and secure apps and services for the workforce across the most complex, hybrid environments. Provide your digital workforce a better, more personal technology experience, while giving IT the control to increase security and reduce costs. Configuration and management are centralized, so IT can build workspaces that roam across devices, operating systems, delivery platforms and more.
RES ONE Automation	Eliminate the need to manually deliver services and apps, eliminating risk of error, creating a strong audit trail, and freeing up resources for projects with more strategic impact on the business. The simple, yet scalable architecture enables customers to automate their daily activities with increased control and better security, laying the foundation for IT as a Service. It's the best way to provision and de-provision services for the workforce and datacenters.
RES ONE Identity Director	Empower the workforce through self service and automated delivery of apps and services. Organizations can improve operational efficiency by automating business processes and IT service delivery. Use as a central identity warehouse to manage access by aggregating data from multiple sources. This lightweight solution easily integrates with an organization's existing technology, maximizing earlier investments without requiring expensive "rip and replace" projects.

ABOUT RES

RES creates, automates and secures digital workspaces to improve the experience and productivity of the workforce while lowering IT costs. RES takes a people-centric approach to making technology access secure, even in complex multi-device/multi-location scenarios, across physical, virtual and cloud environments. RES boasts numerous patented technologies, fast time to value, and superior customer support for more than 2,500 companies around the world. For more information, visit www.res.com, contact your preferred RES partner, or follow updates on Twitter [@ressoftware](https://twitter.com/ressoftware).
